Course description:

The main purpose of this course is to understand how to explain international relations in an academic manner. The course will be divided into three parts. In the first part, the instructor will lecture the basic conceptual framework to analyze international relations and introduce how to explain international relations from different levels of analysis. For the second part, the instructor will lecture important international historical events (WWI, WWII, the Cold War, the post Cold War) by using the framework for analysis taught in the first section and evaluate each level of analysis. For the third and last section, students will conduct presentations about current international events (in Europe, East Asia the Middle East, the US, Russia). Students are obligated to i) use the framework for analysis taught in the first section, ii) evaluate each level of analysis, and iii) come up with policy implications.

Objectives:

1. Understand how to explain international relations. 2. Understand the key concepts (actor sovereignty order) in Political Science. 3. Understand the basic types (imperial feudal anarchic) of world politics. 4. Understand the different levels of analysis (system state individual) to explain international relations. 5. Understand the basic theories of International Relations (Realism Liberalism and Constructivism). 6. Understand the various models of Foreign Policy Analysis (system domestic organization decision making unit and individual). 7. Understand the history of international relations during the 20th century. 8. Understand how to conduct case studies. 9. Understand how to conduct presentations in an analytical way.

Course description:

This course will examine a sample of the ideas and theories that have developed within social sciences during the last two centuries as well as some ideas about a current social order that has emerged during the twenty-first century. We will explore the ideas of classical theorists who are considered?not without some controversy?the founding fathers of social science. We will then take a critical turn toward the ideas of modernity and progress that served to reorganize the social sciences into a more critical and inclusive field of study. Lastly we will briefly survey some new theoretical approaches of contemporary social thinkers. This course will also provide interpretive models for understanding the social world of ideas and theories in connection with historical political and cultural contexts within which these ideas and theories originated and flourished. Throughout this course we will ask the following questions: What is theory What is the use of theory Whom do these theories address What are these theories in response to What drives theoretical questions What can we learn from theory

Objectives:

The objective of this course is to teach students how the shapers of the social sciences viewed interpreted and at times explained the social world. After completing this course students will have the ability to (1) identify key social theorists and their ideas that have made notable contributions to the social sciences; (2) interpret for themselves the relevance of these ideas and theories both past and present; and (3) develop a command of their written and spoken expression through a social science vernacular.

TBA

Assessment:

Students' final grades will be assessed based upon their performances in the following three areas: (1) Case Study Quizzes (2) a Midterm Exam and (3) a Final Exam. Case Study Quizzes: At the close of each unit students will be provided with a case study that attempts to synchronize the major theoretical concepts introduced during each unit. These case studies will be followed by a brief in-class quiz. Each quiz will consist of five short-answer questions and must be completed within a 30 minute time-frame. Students may use their case studies and any notes that have taken about these case studies during the quizzes. Midterm Exam The Midterm Exam will consist of 45 questions pertaining to readings lectures and discussions on the topics of viewing society and the foundations of structural functionalist conflict and symbolic interactionist perspectives. The exam will be made up of three sections divided into the following formats: multiple choice matching and true/false questions. Students will be given 90 minutes to complete the exam. A single sheet of A4 paper with notes (front and back) may be used during the exam. Final Exam The Final Exam will consist of 60 questions pertaining to readings lectures and discussions on the topics of the varieties of structural functionalism conflict and symbolic interactionist perspectives—this exam is not cumulative. The exam will be made up of four sections divided into the following formats: multiple choice matching true/false questions and two short answer questions. Students will be given 90 minutes to complete the exam. A single sheet of A4 paper with notes (front and back) may be used during the exam. Case Study Quizzes (8 @ 5%) 40% Midterm Exam 25%
 Final Exam 35%

Expected academic background:

Students are expected to have completed an introductory course in at least one discipline (i.e. sociology anthropology psychology etc.) among the social sciences.
